

Name : SAPTARSHI CHATTERJEE & INDRANIL MAJI

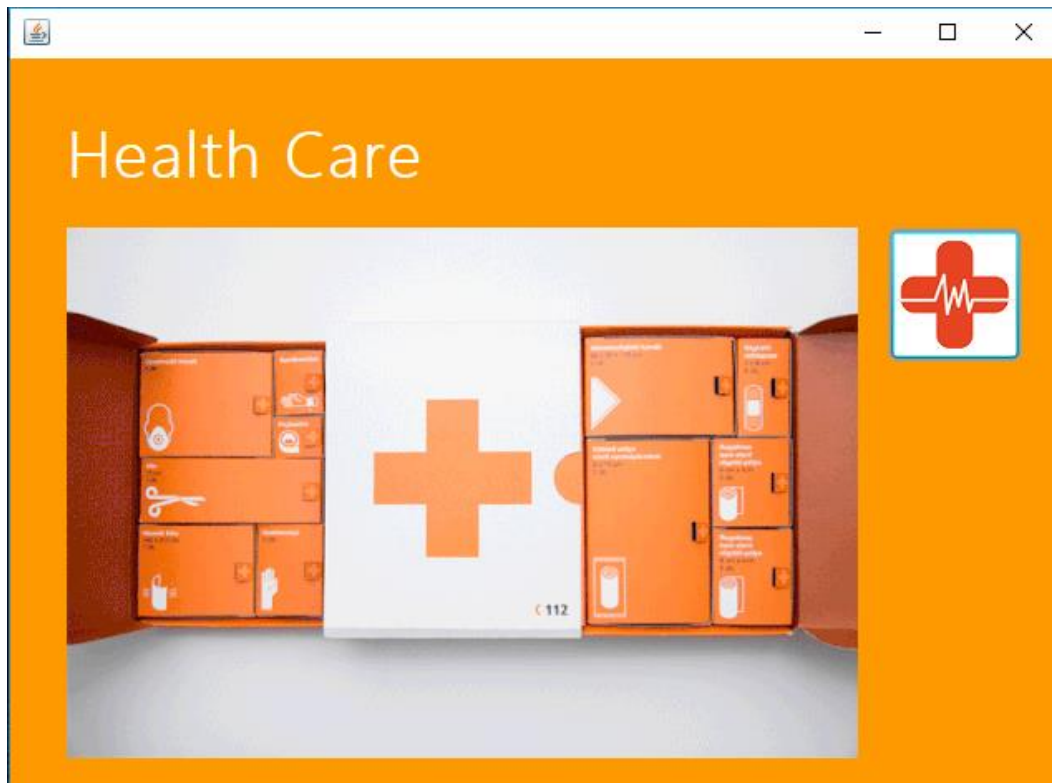

REG NO. 11906426 & 11905492

TOPIC: Virtual Medical Helper

ROLL NO. -61&62

SUBJECT: PROGRAMING IN JAVA

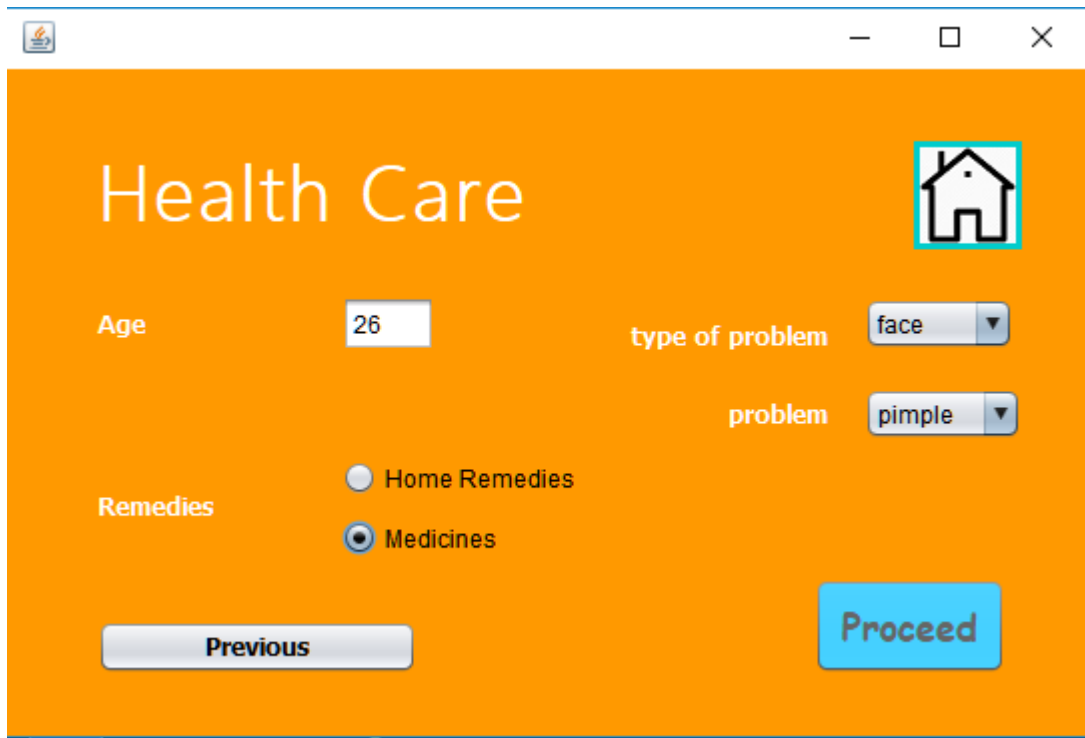

COURSE CODE: CAP 615

#THIS IS THE STARTING PAGE OF OUR PROJECT

As you know our application provides solutions to the medical problems you are facing.

Our application is developed for daily life use in a person's life, now a day's everyone is following a busy schedule. Due to the busy and hectic schedule they face many health issues and they don't get the time to go to a medical consultant and get a solution of their problems. With the help of our application a person can get rid of their daily health care problems. Our application provides the precautions and home remedies, medicines and will also ask if the condition is serious or not of the entered Problem he/she is facing. If the condition is serious, a list of hospitals and kind of doctors the patient should visit will be shown. The list of hospital is being provided as per the patient location he/she have entered during their registration phase.

The screenshot shows a web application window titled "Health Care". The background is orange. At the top left, the text "Health Care" is displayed in white. To the right of the title is a house icon. Below the title, there are several input fields and buttons. On the left, there is a label "Age" followed by a text box containing the number "26". To the right of this, there is a label "type of problem" followed by a dropdown menu showing "face". Below the "Age" field, there is a label "Remedies" followed by two radio buttons: "Home Remedies" (unselected) and "Medicines" (selected). To the right of the "Remedies" section, there is a label "problem" followed by a dropdown menu showing "pimple". At the bottom left, there is a "Previous" button. At the bottom right, there is a "Proceed" button. The window has a standard Windows-style title bar with minimize, maximize, and close buttons.

#This is the home page of our project that shows a friendly gateway from where can choose the field which are suitable for us like –

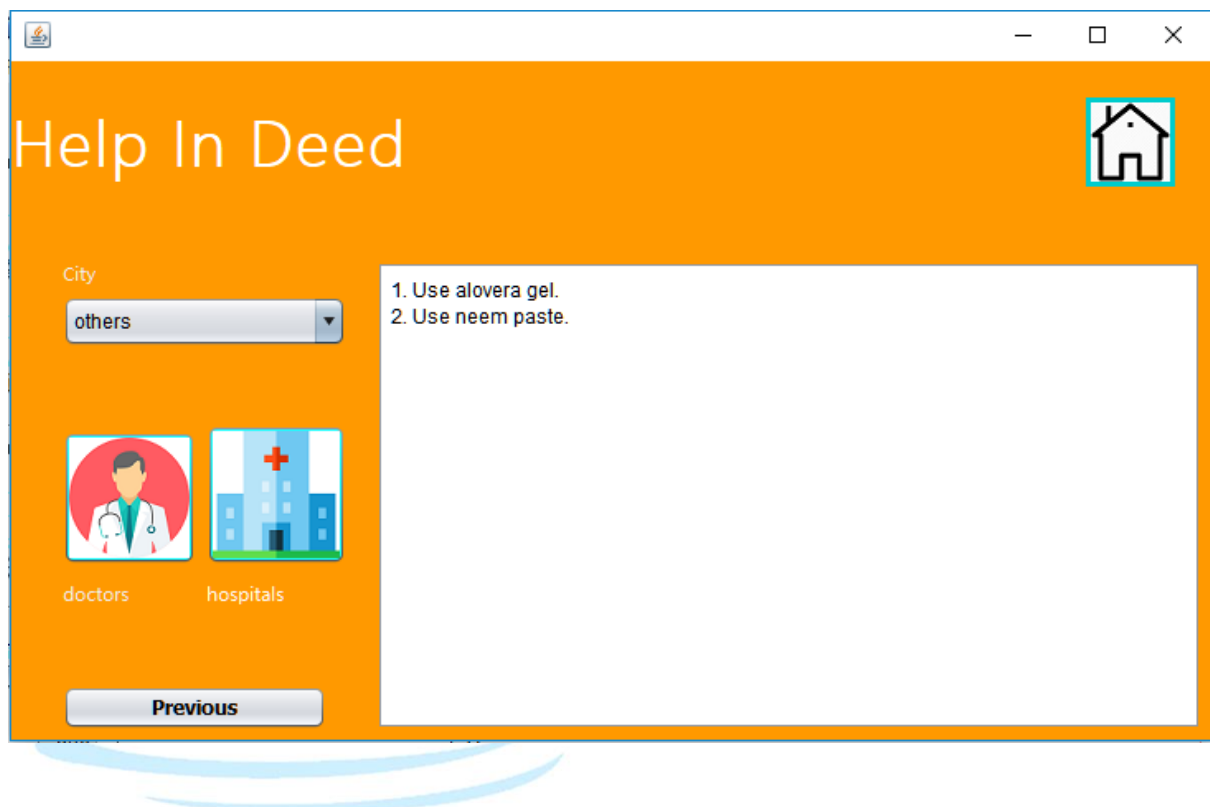

AGE- There is a condition in this application that you have to be above 18 years of age to use this application, this means the patient should not be a child.

REMEDIES- This section is a option given to the user that you want serious Solutions or home remedies which can solve our problem at the present time.

TYPES OF PROBLEM: This signifies where the problem is in the Body.

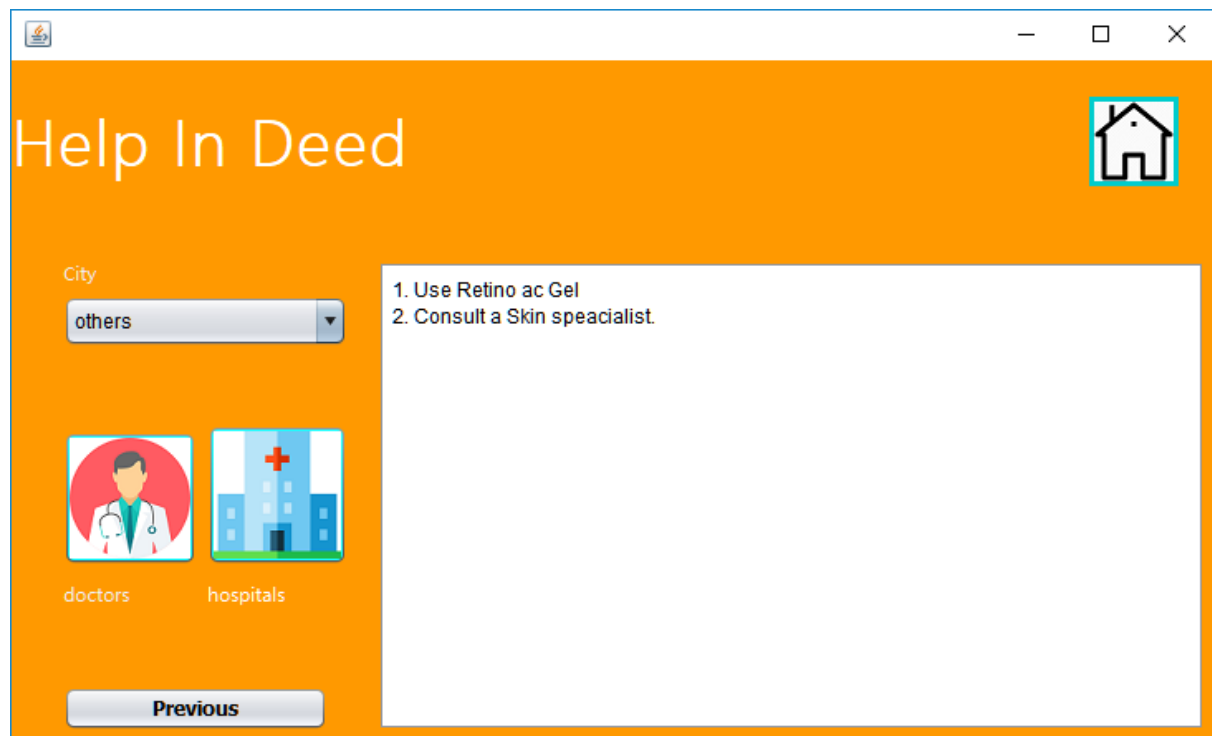

Problem: This field gives you an option to choose which kind of problem is facing at that part of your body.

This are The first Types of solutions home remedies:

This is the Home Remedies for pimples on face.

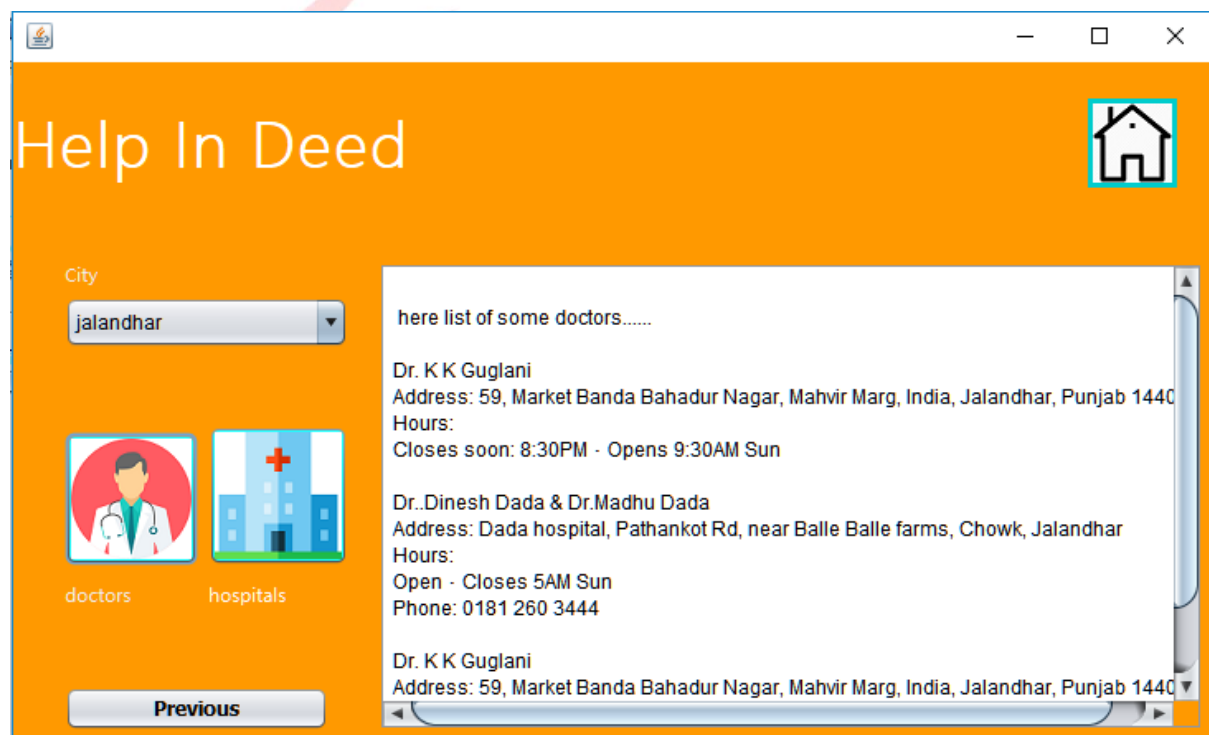

This are The second Type of solutions Doctors or Medicine:

This is the Medicinal way of solution for pimples on face.

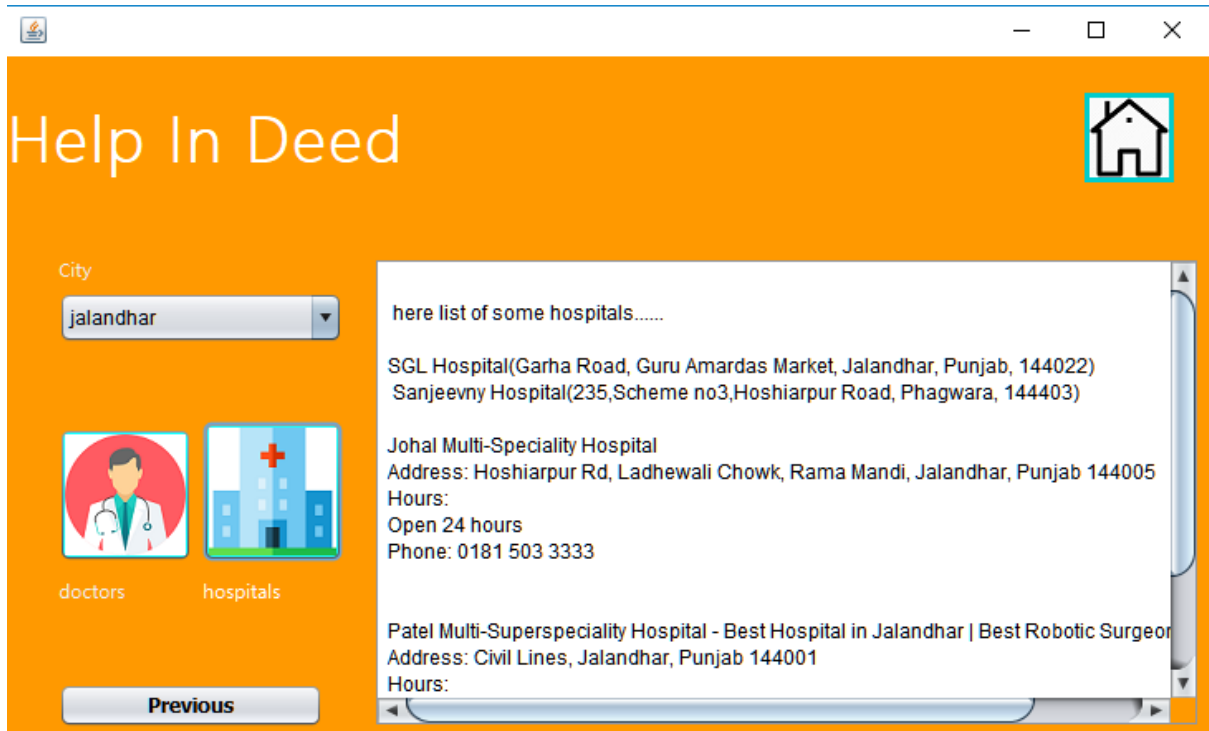

IF THE USER IS NOT SATISFIED WITH SOLUTION:

Or if the condition is serious then the user can choose their locality area and then can find the Doctors near by-

IF THE USER IS NOT SATISFIED WITH SOLUTION:

Or if the condition is serious then the user can choose their locality area and then can find the Hospitals near by-
